

Mounting Instructions - VHB Tape Installation

Printed Plaques

Overview

Your signs came with strips of very high bond tape on the sign back. VHB tape can be used on; metal, plastic, glass, wood, sheetrock. VHB tape adheres to most surfaces but to ensure a permanent installation, we recommend placing a small “dot” of silicone in each corner of the sign during installation.

STEP 1 - Ensure Installation surface is CLEAN and DUST FREE.

STEP 2 - Sign Leveling

- Place the sign against the wall at the recommended height and level the sign.
- Trace a small line on the wall along the sign top & side to mark the leveled edges.

STEP 3 - Mounting the Sign

- Apply a small “dot” of silicone (optional) in each corner of the sign back (1/4” to 3/8” diameter in size).
- Remove the paper backing from the tape
- Using the leveling lines as a guide, carefully position the sign at the level mark and press firmly. (Note - make sure your sign is aligned with leveling marks before pressing.)

Signage Cleaning Instructions

- Do not clean unless sign requires cleaning.
- Do NOT use solvents or ammonia based cleaners.
- Use a damp cloth that is non abrasive and lint free cloth to wipe the sign surface.
(Note - acrylic material can easily scratch - use a soft cloth during cleaning)
